A cat made with socks

- This game is a little tricky even if it doesn't look like it, so now I'll explain:
- First you need a pair of socks.
- The first thing we're gonna do is the cat's body.
- After the body is buried, we haze the head.
- Then let's whip up the cat's tail.
- And finally we put eyes and nose.
- This is the order in which we attach the cat, in the prosima slide explain step by step how to do it. Bear in mind that to make this cat more or less you have to sew saver, or else ask for help from someone.

How to make the cat step by step

- Having the pair of socks we take one of them and turn it around, so we can draw the shape of the cat.

- After drawing where the black is we have to sew it, and then we cut out the black.

- Then we cut into the place that appears in the photo and turn it around, so we can put cotton.

- We sew the hole where we put the cotton.

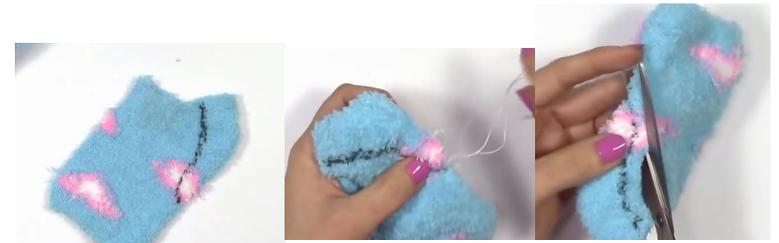

- Now we take the other sock, and we give it to him.

- In it we draw another shape that we will also have to sew, cut, give the good fortune again, put cotton and again sew.

- With what's left, we draw the cat's tail, sew it up, cut it up and put cotton in it.

- With all the cat parts done, all I need now is to find them.

- The first part of the body that we are going to sew is the head, the hunir in the part in which we put cotton in the body, so that it does not look bad.

- And the last part that's left is the tail, so we'll sew it back up.

- And the last thing to finish our kitten is the eyes and nose.

- We'll need two little balls a little big with holes, and then we'll mark where the eyes go and then we'll sew them up.

- Then we take a smaller ball and sew it too.

- And we'll have our kitten, if you want, you can also decorate it with a ribbon to make it look like a necklace. Keep in mind that depending on the sock you wear may turn out better or worse.
